Environmental Crisis Exhibition - Science and Art

Thursday 13 February – Saturday 14 March, (Private View: Thursday 13 February, 4pm-8pm)

Free entry

Gerald Moore Gallery presents *Environmental Crisis Exhibition, Science and Art*.

This is the second year in a row that Gerald Moore Gallery has focused on an exhibition celebrating the link between Science and Art. This year's call out focused on the Environmental Crisis; being such a prevalent issue in the news and holding such importance for young people, we decided the shortlisting of artists' works would be decided upon by students at Eltham College, aged between 14-18.

The artworks selected focus on the major impacts we face: climate change, degraded air quality, deforestation, the decrease of animal population, land and sea pollution, soil erosion and biodiversity losses. As a gallery with learning at its core we want to give space to raising awareness of these challenges and encourage everyone to act.

NOTES TO EDITORS

About Gerald Moore Gallery

Gerald Moore Gallery is a young centre for modern and contemporary art with learning at its heart. Opened in April 2012, in Mottingham, the gallery is uniquely set within the grounds of Eltham College and is a valuable resource for the students and the local community. The gallery has gained momentum hosting some exciting exhibitions including works by *Matisse*, *Louise Bourgeois* and *Cornelia Parker*, whilst supporting emerging local artists. In unison with the exhibitions, the gallery's outreach programme works with local community groups, teachers and schools, creating lasting relationships with our locality. Gerald Moore Gallery was made possible with the foresight and generosity of Old Elthamian, Dr Gerald Moore, many of whose works are archived at the gallery and who has a permanent exhibition on display. www.geraldmooregallery.org
